Summary: when creating a group on a board view options, a week that starts on Sunday is automatically set despite the "Language & Region" setting

Pre-condition: In "Settings&Members"/"Language & Region"/"Start week on Monday" set up. Create a Board view database with Properties Date and Properties Weekdays(from Monday to Sunday)

Steps to reproduce:

1. Set the group by Properties Date(by Week);

2. Set the sub-group by Properties Weekdays(select from Monday to Sunday).
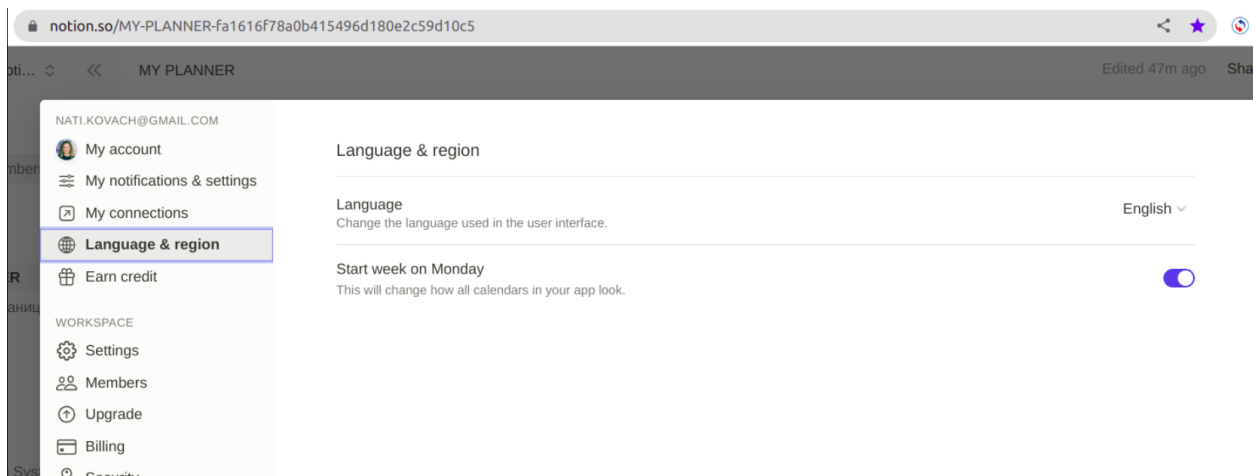

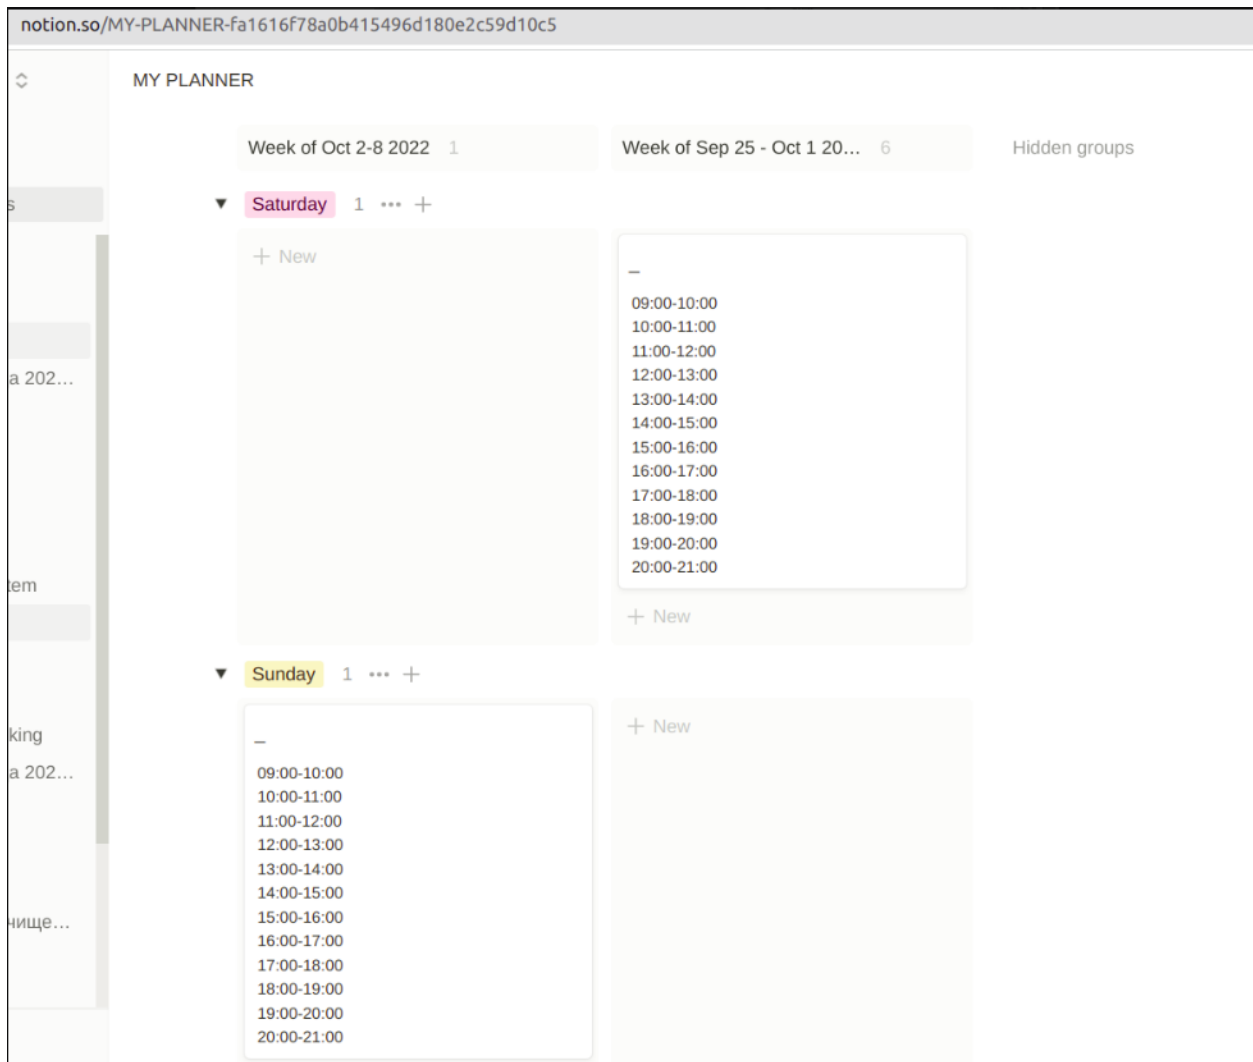

Expected result: based on region settings, visible groups that include weeks should start on Monday

Actual result: visible groups include weeks that start on Sunday

Category: localization

Environment: Google Chrome version 106.0.5249.61. Ubuntu 20.04
